INDEX TO VOLUME I

Authors

Adams, F. D.—The Geology of Ceylon, 425, 467.

Anderson, J. A.—see Newton, R.

Ashton, M. R.—see Hutchinson, A. H.

Basterfield, S. and Powell, E. C.—Studies in Iso-ureas and iso-ureides. I. Some new Iso-ureas; Salts and acyl derivatives, 261.

Basterfield, S. and Powell, E. C.—II. The condensation of Iso-ureas with diketones and ketonic esters, 185.

Boswell, M. C. and McLaughlin, R. R.—The chlorination of methane, 240.

Boswell, M. C. and McLaughlin, R. R.—A study of some factors influencing the activity of aluminum and ferric chlorides in the Friedel and Crafts Reaction, 400.

Boyle, R. W. and Froman, D. K.—I. Reflection of sound energy and thickness of plate reflector—Ultrasonic method, 405.

Burton, E. F. and Pitt, A.—A new method for the rapid estimation of moisture in wheat, 155.

Clarke, A. E.—See Newton, R.

Froman, D. K.—See Boyle, R. W.

Geddes, W. F.—Chemical and physico-chemical changes induced in wheat and wheat products by elevated temperatures, 528.

Grace, N. S.—See Thorvaldson, T.

Hadwen, S.—Color changes in *Lepus americanus* and other animals, 189.

Harrington, J. B. and Smith, W. K.—The inheritance of reaction to black stem rust of wheat in a *Dicoccum* × *Vulgare* Cross, 163.

Harrison, F. C.—The discoloration of halibut, 214.

Harrison, F. C.—Potassium nitrate in Canadian cheese, 256.

Hutchinson, A. H. and Ashton, M. R.—The specific effects of monochromatic light on the growth of *Paramoecium*, 292.

Klugh, A. B.—The effects of the ultra-violet component of sunlight on certain marine organisms, 100.

Lehman, J. V.—See Newton, R.

Malloch, J. G.—Studies on the resistance of wheat starch to diastatic action, 111.

McLaughlin, R. R.—See Boswell, M. C.

Melburn, M. C.—Heterotypic prophases in the absence of chromosome pairing, 512.

Newton, R., Lehmann, J. V. and Clarke, A. E.—Studies on the nature of rust resistance in wheat. I. General introduction. II. Physico-chemical properties of host-cell contents. III. Culture and injection experiments to demonstrate inhibiting or accessory substances, 5.

Newton, R. and Anderson, J. A.—IV. Phenolic compounds of the wheat plant, 86.

Pitt, A.—See Burton, E. F.

Powell, E. C.—See Basterfield, S.

Rankin, A. C.—Vaccination against tuberculosis with Bacillus Calmette-Guérin, 48.

Shelton, G. R.—See Thorvaldson, T.

Shipley, J. W.—The alternating current electrolysis of water, 305.

Smith, W. K.—See Harrington, J. B.

Thorvaldson, T. and Grace, N. S.—The hydration of the aluminates of calcium, 36.

Thorvaldson, T. and Shelton, G. R.—Steam-curing of Portland cement mortars. A new crystalline substance, 148.

Thorvaldson, T., Grace, N. S. and Vigfusson, V. A.—The hydration of the aluminates of calcium. II. The hydration products of tricalcium aluminate, 201.

Thorvaldson, T., Wolochow, D. and Vigfusson, V. A.—Studies on the action of sulphates on Portland cement. I. The use of the expansion method in the study of the action of sulphates on Portland cement mortar and concrete, 273.

Thorvaldson, T., Vigfusson, V. A. and Wolochow, D.—II. Steam-curing of Portland cement mortar and concrete as a remedy for sulphate (alkali) action, 359.

Thorvaldson, T., Vigfusson, V. A. and Wolochow, D.—III. The effect of the addition of silica gel to Portland cement mortars on their resistance to sulphate action, 385.

Tory, H. M.—Foreword, 3.

Vigfusson, V. A.—See Thorvaldson, T.

Wolochow, D.—See Thorvaldson, T.

INDEX TO VOLUME I

Subjects

Acartia clausi, 108.

Achromobacter pellucidum, 236.

Acyl derivatives of iso-ureas, I. Some new iso-ureas, (Basterfield and Powell), 261.

Adsorption of HCl by $AlCl_3$, 401.

Aeginella longicornis, 104.

Aerobacter aerogenes, 259.

Aerobacter cloacae, 237, 259.

Alkali waters on concrete, Effect of, 36, 148, 201, 273, 359, 385.

Alternating current electrolysis of water, 305.

Aluminates of calcium, The hydration of the, I. A new crystalline form of hydrated tricalcium aluminate, (Thorvaldson and Grace), 36.
The hydration of the, II. The hydration products of tricalcium aluminate. (Thorvaldson, Grace and Vigfusson), 201.

Aluminum chloride, Activity as a catalyst in the Friedel and Crafts reaction of, (Boswell and McLaughlin), 400.

Arcing, in high voltage electrolysis, 342.
Characteristics of, 345.

Bacillus Calmette-Guérin (B.C.G.), Vaccination against tuberculosis with, (Rankin), 48.
Virulence, 51.

Baking quality of flour, Influence of time and temperature of heating on, (Standard procedure), 537.
(Bromate procedure), 541.
Influence of moisture content on, 550.
Influence of varying the conditions of heating on, 533.

Benzene-sulphonyl-n-propyl iso-urea, 266.

Benzyl iso-urea, 270.

Bulk modulus in the determination of the velocity of sound waves, 423.

2-n-Butoxy-barbituric acid, 269.

n-Butyl-iso-urea, 268.

Calanus finmarchicus, 103.

Calcium, The hydration of the aluminates of, I. A new crystalline form of hydrated tricalcium aluminate, 36.
The hydration of the aluminates of II. The hydration products of tricalcium aluminate (Thorvaldson, Grace and Vigfusson), 201.

Carbon tetrachloride, 253.

Catalysis, Some factors influencing the activity of $AlCl_3$ and $FeCl_3$ in the Friedel and Crafts reaction, 400.

Cement (Portland), Effect of silica gel on the resistance to sulphate action of Portland cement mortars, 385.
The hydration of the aluminates of calcium, 36, 201.
Steam-curing, 359.
Steam-curing of Portland cement mortars. A new crystalline substance (Thorvaldson and Shelton), 148.
Studies on the action of sulphates on Portland cement. I. The use of the expansion method in the study of the action of sulphates on Portland cement mortar and concrete. (Thorvaldson, Wolochow and Vigfusson), 273.

Ceylon, The Geology of, 425, 466.
Recent, 443.
Pleistocene, 443.
Miocene, 443.
Jurassic, 444.
Archean, 444.

Charnockites and allied rocks, 447, 452, 467.

Cheese, Potassium nitrate in Canadian Cheese, (Harrison), 256.

Chlorination of methane, (Boswell and McLaughlin), 240.

Chloroform, 246.

Chromosome Pairing, Heterotypic Prophases in the absence of, (Melburn), 512.

Color changes in *Lepus Americanus* and other animals (Hadwen), 189.

Concrete, Hydration of the aluminates of calcium, 36, 201.
Steam-curing of Portland cement mortars, 148, 359.
Action of sulphates on, 273.
Effect of addition of silica gel to, 385.

Condensation of iso-ureas with diketones and ketonic esters, (Basterfield and Powell), 285.

Crystalline limestones, 491.

Diakinesis, 519.

Diastase, Inactivation, 118.
Taka-Diastase, 127.
Comparison of Taka-diastase and extracted flour diastase, 131.

Diastatic action, Studies on the resistance of wheat starch to, (Malloch), 111.
Effect of sprouting on diastatic action and starch resistance, 142.

Dicoccum × Vulgare cross, The inheritance of reaction to black stem rust in, (Harrington and Smith), 163.

Diketones, Condensation of ketonic esters with, 285.

Discoloration of Halibut, (Harrison), 214.

Duralumin pendulum, Reflection of ultrasound by, 415.

Electrolysis, The law of alternating current, 315.
Mechanism of A.C., 329.

Electrolysis of water, The alternating current, 305.

Endothia parasitica, 86.

Epeirogenic movements in Ceylon, 437.

Escherichia coli, 259.
communior, 259.
neapolitana, 259.

Ethane, 240.

2-Ethoxy-4-6-dimethyl-pyrimidine, 288.

2-Ethoxy-4-6-dimethyl-5-bromo-pyrimidine, 288.

2-Ethoxy-uracil-4-acetic acid, 291.

Ethyl chloride, 254.
2-Ethoxy-uracil-4-acetate, 290.
2-Ethoxy-4-5-dibromo-uracil-4-acetate, 290.
Iso-ureido-acetyl-acetone, 288.

Eurytemora herdmani, 107.

Expansion method, Effect of steam curing of Portland cement mortar and concrete on sulphate resistance, 359.
Effect of silica gel on the sulphate resistance of Portland cement mortar, 385.
Study of the action of sulphates on Portland cement mortar and concrete, 273.
Use of lean and rich mortars, 279.

Flavobacterium balustinum, 233.
diffusum, 233.
dormitor, 233.
fucatum, 229.
marinum, 233.
maris, 229.
turcosum, 229.

Foreword, (Tory), 3.

Friedel and Crafts reaction, Some factors influencing the activity of $AlCl_3$ and $FeCl_3$ in, 400.

Gas, The Chlorination of Methane (Boswell and McLaughlin), 240.
Generated in heaters and boilers, 306.

Gems, 507.

Geological structure of Ceylon, 498.

Geology of Ceylon, (Adams) 425, 466.

Granulites (Leptynites), 453, 482.

Graphite, 506.

Hair, Periodic changes of color in *Lepus Americanus* (Hadwen), 190.
Physical and chemical aspects of hair color, 198.
Physical changes in the hairs of rabbits, 195.

Halibut, The discoloration of, (Harrison), 214.

Harmonics in sound reflection, 422.

Helminthosporium Sativum, Effect of phenols on the growth of, 30.

Heterotypic Prophases in the Absence of Chromosome Pairing, 512.

Hybrid, Heterotypic Prophases in a Wheat Rye, 514.

Hydration of the Aluminates of Calcium,
I. A new crystalline form of hydrated tricalcium aluminate (Thorvaldson and Grace), 36.
In saturated steam at 150° C., 40.
In water at room temperature, 42.
II. The hydration products of tricalcium aluminate (Thorvaldson, Grace and Vigfusson), 201.

Inhibiting or accessory substances,
III. Culture and injection experiments to demonstrate, 16.

Interference spectroscopy of optics to sound, Application of the theory of monochromatic, 405.

Iron ore, 505.

2-iso-amoxy-barbituric acid, 270.

Iso-amyl iso-urea, 270.

Iso-butoxy-barbituric acid, 269.

Iso-butyl-iso-urea, 269.

2-Iso-propoxy-barbituric acid, 268.

Iso-propyl iso-urea, 267.

Iso-ureas, Derivatives of, 285.

Iso-ureas and iso-ureides, I. Some new iso-ureas; salts and acyl derivatives (Basterfield and Powell), 261.

Ketonic esters, Condensation of diketones with, 285.

Lactobacillus acidophilus, 259.

Lead pendulum, Reflection of ultrasound by, 410.

Lepus Americanus and other animals, Color changes in, 189.

Light on the growth of paramœcium, Specific effect of monochromatic, 292.

Lophius piscatorius, 105.

Marine organisms, The effects of the ultra-violet component of sunlight on (Klugh) 100.

Mendelian inheritance of resistance in a species cross, 183.

Methane, Chlorination of (Boswell and McLaughlin), 240.

Methods, Brown-Duvel method of determining moisture in wheat, 156.
A new method for the rapid estimation of moisture in wheat (Burton and Pitt), 155.
For the determination of diastatic activity, 133.
Preparation of tricalcium aluminate, hexahydrate, 202.

2-methoxy-barbituric acid, 265.

Methyl chloride, 243.

Methylene chloride, 246.

Micrococcus aurantiacus, 226.
candidus, 226.
citreus or **staphylococcus citreus,** 226.
flavus, 226.
varians, 226, 259.

Minerals of Economic Value (in Ceylon), 505.

Moisture in wheat, A new method for the rapid estimation of, (Burton and Pitt), 155.

Moisture content on changes in baking quality of flour induced by heat, Influence of, 550.

Monila sitophylla, 259.

Mortars, Steam-curing of Portland cement, 148.
I. The use of the expansion method in the study of the action of sulphates on Portland: ement mortar and concrete, 273.
and concrete, Effect of steam-curing on the resistance to sulphate action of, 359.
and concrete, Effect of silica gel on the resistance to sulphate action of, 385.

α-Naphthalene - sulphonyl - methyl - iso-urea, 264.

Natural Gas, The chlorination of methane, (Boswell and McLaughlin), 240.

Oenothera biennis, 524.
biennis sulfurea, 525.
franciscana, 523.
muricata, 523.

Paraffin pendulum, Reflection of ultra-sound by, 419.

Paramœcium caudatum, 295.

Peneplains of Ceylon, 431.

Phenol hypothesis, 87.

Phenols, Relation of phenolic content of plants to rust resistance, 95.

Phenolic compounds of the wheat plant, IV. Studies on the nature of rust resistance in wheat (Newton and Anderson), 86.

Phenols, Effect on *Helminthosporium sativum* 30.

Phenyl-ethyl iso-urea, 271.

Phthalyl-di-(Methyl-iso-urea), 264.

Pigmentation of the skin in rabbits and other animals, 193.

Poisson's ratio. Application in the formula of velocity of sound in thin discs, 423.

Potassium nitrate in Canadian cheese, (Harrison), 256.

2-n-Propoxy-barbituric acid, 267.

n-Propyl iso-urea, 266.

Proteus sp., 259.

Pseudomonas fluorescens, 219, 259.

Puccinia graminis tritici, 16.

Quartzose biotite gneiss, 446, 467.

Reflection of sound energy and thickness of plate reflector, The relation of, (Boyle and Froman), 405.

Resistance, The nature of, 184.

Resistance of wheat starch to diastatic action (Malloch), 111.

Rhodococcus agilis, 229.

Rocks of Ceylon, Classes of.
Quartzose biotite gneisses, 446.
Charnockite and allied rocks, 447.
Granulites, 453.
Highly altered rocks of sedimentary origin, 454.
Galle series, 459.
Balangoda series, 463.

Rust,
Inheritance of reaction to black stem rust of wheat in a *Dicoccum* × *Vulgare* cross (Harrington and Smith), 163.
Reaction of hybrids to a number of forms of, 175.
Resistance in wheat. I. General introduction. II. Physico-chemical properties of host-cell contents. III. Culture and injection experiments to demonstrate inhibiting or accessory substances (Newton, Lehmann, and Clarke), 5.
Resistance in wheat, Studies on the nature of. IV. Phenolic compounds of the wheat plant (Newton and Anderson), 86.

Salicylate of
Benzyl iso-urea, 271.
n-butyl iso-urea, 268.
ethyl iso-urea, 266.
iso-amyl iso-urea, 270.
iso-butyl iso-urea, 269.
iso-propyl uso-urea, 267.
methyl iso-urea, 264.
phenyl-ethyl iso-urea, 271.
n-propyl iso-urea, 266.

Sarcina lutea, 229.

Second contraction, in a wheat-rye hybrid, 515.
in the rye parent, 518.

Silica gel, Effect on the resistance of mortars to the action of sulphate waters, 385.
The resistance to sulphate action of lime-silica gel mortars, 359.

Sillimanite Garnet Rocks (Khondalite), 455, 486.

Sodium chloride, 506.

Sound Energy, Reflection of, by the ultrasonic method, 405.
Ratio of reflected to incident, 405.

Staphyllococcus pyogenes albus, 259.
aureus, 259.

Starch, Studies on the resistance of wheat starch to diastatic action (Malloch), 111.

Steam-curing, Action on sulphate resistance of Portland cement, 359.
of Portland cement mortars. A new crystalline substance (Thorvaldson and Shelton), 148.

Submarine plateau around Ceylon, 436.

Sulphate action,
Hydration of the aluminates of calcium, 36, 201.
Steam-curing of Portland cement mortars, 148, 359.
Use of the expansion method in the study of, 273.
Effect of the addition of silica gel to Portland cement on, 385.

Synizesis, in a wheat-rye hybrid, 514.
in the rye parent, 517.

Tensile strength of mortar bars before and after exposure to sulphate solutions.
Without treatment, 279.
After steam-curing, 150.

Thorianite, 505.

Tortanus discaudatus, 106.

Toxicity to disease organisms in plants, 86.

Tricalcium aluminate,
Properties, 38.
Hydration products, 201.
Method of preparation, 202.
Hexahydrate, Properties of
solubility, 203.
density, 203.
X-ray diffraction pattern, 204, 211.
Behavior on drying at 100° C., 207.
Higher hydrate, Properties of
Preparation, 205.
Density, 209.
Optical properties, 210.

Tuberculosis, Vaccination with bacillus Calmette-Guérin against, 48.

Tubullaria crocea, 105.

Ultrasonics, Reflection of sound energy and thickness of plate reflector (Boyle and Froman), 405.

Ultra-violet component of sunlight on certain marine organisms, The effect of (Klugh), 100.

Ultra-violet light, Specific effect on the growth of *Paramoecium*, 292.

Urea derivatives, I. Some new iso-ureas; salts and acyl derivatives (Basterfield and Powell), 261.

Vaccination agains tuberculosis with bacillus Calmette-Guérin, 48.

Water, Alternating current electrolysis of, 305.
Decomposition by high voltage arcing, 342.

Wheat,
Inheritance of reaction to black stem rust of wheat in a *Dicoccum* × *Vulgare* cross, 163.
A new method for the rapid estimation of moisture in, 155.
and Wheat Products, Chemical and Physico-chemical effects of elevated temperatures in, 528.
Studies in the nature of rust resistance in I. General introduction, II.Physico-chemical properties of host-cell contents, III. Culture and injection experiments to demonstrate inhibiting or accessory substances (Newton, Lehmann and Clarke), 5.
Studies on the nature of rust resistance in, IV. Phenolic compound of the wheat plant (Newton and Anderson) 86.
Studies on the resistance of wheat starch to diastatic action (Malloch), 111.

X-Rays, Diffraction spectra of tricalcium aluminate, 45.

ERRATA

In line 10 of the abstract, page 48, for "80" read "84" and for "14" read "21".

On page 84:

Lines 1 and 6 from bottom, for "14" read "21";
Lines 2 and 10 from bottom, for "8" read "10";
Lines 3 and 8 from bottom, for "80" read "84";
Line 9 from bottom, for "92" read "90".

Page 272, cancel the reference marked "2" and renumber the remaining references.

Page 361, Table II, last column, change "315" to "265", and under this number insert "390" in the blank space.

Page 557, Reference 26, change Sci. Agr. 9:477. 1922. to Can. Expt. Farms Bull. 97:57. 1921.
